subject Re: Gas Can Paper – Review
signed-bywiai.com

Jul 15

Glen,

Sorry for everything to have taken so long, but I got back word from the reviewers of the written paper that they are satisfied and have given their blessing. Attached is the letter that I've drafted indicating the fact that both the presentation and written paper have been peer reviewed by the SFES. Let me know if you have any questions or comments. I also have the presentation review sheets that I can either send to you or give them to you on Saturday at the SFES picnic at Simi. Let me know your preference.

Thanks again for your patience.

Steve

Dear Dr. Stevick:

Your presentation at the Society Seminar on March 19, 2010 titled, *Portable Plastic Gasoline Container Explosions and Their Prevention*, has been peer reviewed and approved for its forensic content by a majority of the attending members of the Society of Forensic Engineers and Scientists.

Your written paper of the same title was evaluated by two members and was also approved for its professional competency, style and clarity.

Very truly yours,

THE SOCIETY OF FORENSIC ENGINEERS AND SCIENTISTS

Steven L. Wolfe
